

Vincent Good

Industrial Engineer

As an Industrial Engineer, I enjoy using my problem-solving ability and technical skills to tackle tasks head-on. My academic background, industrial placements, and work experience have given me the ability to assess a situation and adapt my approach accordingly in a high-stress environment. This also further developed my attention to detail, team management and interpersonal communication skills.

Having travelled to England, Southern Africa, and South-East Asia, I am accustomed to adapting to my surroundings and bringing a unique perspective to others. Africa is my continent, and I believe in helping grow it to its full potential.

EXPERIENCE

2020 - 2021	Industrial Engineering Intern Vacation Work (4 weeks) Certus Engineering Performed a time study to gather data on employee performance. Analysed the data and presented it to my mentor. Implemented 5S.
2020 - 2020	Industrial Engineering Intern Vacation Work (6 weeks) HouseZero - Prefabricated modular home fabricators Designed the plan to move to a new facility, as well as partially designed the floor plan for the new facility.
2013 - 2016	Substitute manager and waiter Part Time Toni's Fish & Chips Co. Waited and was the substitute manager at a 54-seater restaurant.

EDUCATION

2016 - Present	Bachelor of Industrial Engineering University of Pretoria
